

DoView Tool B11 - Collateral Typically Accompanying a DoView Strategy/Outcomes Diagram

B11

There is a standard set of collateral that usually accompanies a DoView strategy/outcomes diagram. The major elements in this are:

DoView Booklet - printed booklet containing the one or more DoView strategy/outcomes diagrams developed for the organization or initiative.

A clickable drill-down webpage version of the DoView strategy/outcomes diagram on an intranet or publicly available on the internet using Google Slides, PowerPoint or the DoView Planning legacy app.

Printed poster(s) of the DoView strategy/outcomes diagrams providing an overview of all of the diagrams in the DoView Booklet for quickly overviewing them.

Documentation regarding how the DoView strategy/outcomes diagrams have been built and the relevant DoView Planning tools being used (e.g. including the relevant tools referenced from this book) with acknowledgment to this book and a link to DoViewPlanning.Org for more information.

An electronic version of the DoView strategy/outcomes diagrams in a suitable app.

Links to the relevant DoView subpages from any online Dashboards created to summarize indicators measuring boxes from the relevant DoView strategy/outcomes diagram subpage.
