

DoView Tool B13 - DoView Strategy Diagrams

Helping to Extend Strategic Foresight Explainer

DoView Strategy/outcomes diagrams allow us to project our strategic thinking into the future because they include the dimensions of time and sequence. They do this in a way that 'flat' sets of outcomes and strategies within traditional strategic plans that do not visualize the 'This-Then' structure do not.

When you look at these lower-level steps on the left of the DoView . . .

. . . your eye is immediately drawn to these higher-level outcomes as they follow a left-to-right 'This-Then' progression. This helps you to focus on the future.
