

DoView Tool B1 - Evolution of Use of Visual Models in Documents and Tools Used in Planning, Implementation and Reporting Explainer

Planning documentation has evolved from just using text-based documents to now involving interactive drill-down strategy/outcomes diagrams within government strategy, planning, implementation and reporting.

Using traditional text-and-table-based documents

NOW

FUTURE

Using visualization-based standardized interactive real-time drill-down strategy/outcomes diagrams

- Free-form text-based planning documents
- Table-based planning documents
- Increasing use of ad hoc static diagrams and visuals at lower levels within the planning process and informally with higher-level decision makers
- Standardized DoView strategy/outcomes diagram-based used in some parts of planning
- DoView strategy/outcomes diagram-based planning tools used across all levels of planning, innovation, implementation, performance measurement and reporting
