

DoView Tool B21 - Politicians, Government Agency Business-As-Usual and Citizens' Outcomes Integration Tool

Shown below is how politicians' outcomes, government agency business-as-usual outcomes and citizens' outcomes can be integrated into a set of DoView strategy/outcomes diagrams. In some cases, these can be combined into a single integrated strategy/outcomes diagram - for instance by joining politicians' and agency business-as-usual strategy/outcomes diagrams together. You can then use other tools such as DoView Visual Alignment to map activities and projects onto the diagrams to show that you have alignment between agency or initiative activities and outcomes.

WHY agencies are doing what they are doing

DoView strategy/
outcomes
diagrams of
politicians'
outcomes

A visual
representation of
their up-to-date
political manifesto

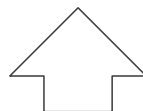

DoView strategy/
outcomes
diagrams of
agencies business-
as-usual priorities

A visual representation of
essential work that
government agencies
must always do

DoView strategy/
outcomes
diagrams of
citizens' outcomes

A visual representation
of outcomes for groups
of citizens

Government agency and provider activities
and projects mapped onto these with DoView
Visual Alignment to make sure that there is
visual line-of-sight alignment

WHO, WHAT, WHERE,
WHEN, \$ activity being
done by government
agencies, providers,
and communities

Government agency,
provider, stakeholder and
community mobilization
initiatives (programs,
projects, initiatives, activities)
