

DoView Tool B3 - A Roadtrip Shown as a DoView Strategy/Outcomes Diagram Example

The 'Route 66 DoView Strategy/Outcomes Diagram' below illustrates how a 'This-Then' DoView strategy diagram works. Outcomes are on the right-hand side, and the steps that it is believed will lead to them are shown on the left. These diagrams can be built from bottom-to-top or from left-to-right. The left-to-right format has the advantage that it is a more natural format for those who speak languages that are read from left-to-right.
