

DoView Tool F6 - Embedding Evidence in DoView Strategy/Outcomes Diagram Templates Tool

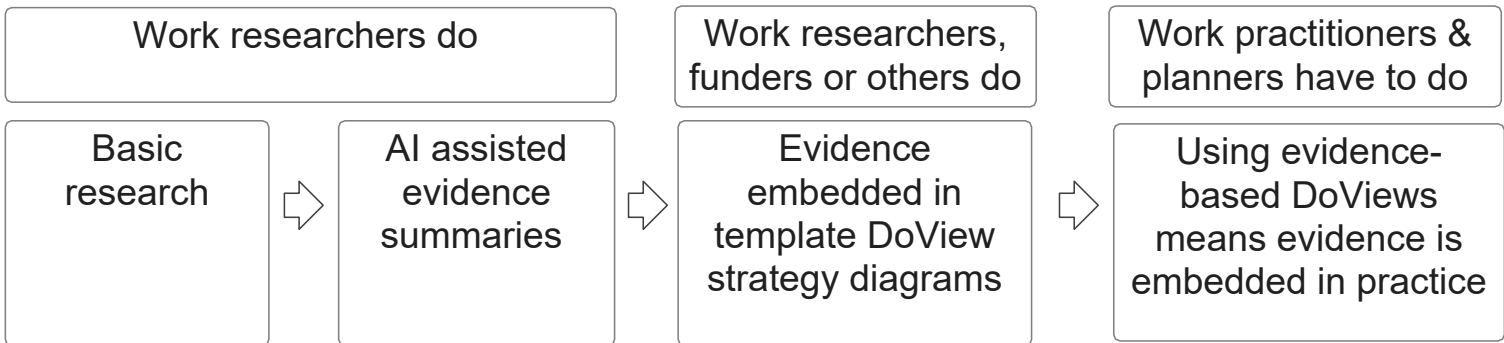

F6

You can construct DoView strategy/outcomes diagrams as template strategy/outcomes diagrams and embed evidence within them. If practitioners and planners then use these in their planning and implementation work, evidence-based practice can be fostered without requiring additional work on the part of practitioners and planners. It does not even matter whether practitioners and planners are even particularly aware that they are using evidence-based practice when their work is being guided in this way.

Current approach

Evidence-embedded DoView strategy/outcomes diagram template approach
