

DoView Tool G14 - Developing an Evaluative Rubric/ Success Criteria Using a DoView Strategy Diagram

You can summarize whether or not an organization, agency, provider, policy or initiative is 'successful' using a sliding scale of success (e.g. from 3 to 1). To do this, develop a set of criteria to determine where an initiative is positioned on this scale. Such a set of criteria is often called a rubric, success criteria list or a maturity model. You can use a DoView strategy/outcomes diagram to either develop such a rubric or to assess how comprehensive an existing rubric is.The success criteria below have been developed from the gray boxes in the DoView outcomes diagram below.

3. Successful initiative All archers have a basic degree in archery and a third or more an advanced degree All bows are less than two years old and from a reputable brand Bow strings pulled back to 100% of stretch 95% of the time Each archer fires at least 15 arrows a minute Bow lined up with bullseye 95% of the time
2. Partially successful initiative 50% of archers have at least a basic degree in archery All bows are less than five years old and from a reputable brand Bow strings pulled back to 75% of stretch 95% of the time Each archer fires at least 10 arrows a minute Bow lined up with bullseye 75% of the time
1. Unsuccessful initiative Less than 25% of archers have at least a basic degree in archery Some bows are more than 8 years old and many are from unreliable brands Bow strings pulled back to less than 50% of stretch 95% of the time Many archers firing less than 5 arrows a minute Bow lined up with bullseye less than 60% of the time
